CREATING THE OUTDOOR OASIS

Summer is upon us and with it comes barbeques, parties and gardening – so creating outdoor living spaces is a must. Whether it's for entertaining or

just relaxing, a deck, patio, porch or yard can be an oasis for your buyers. Located off the kitchen/breakfast for easy access to the grill, or off the family room as an extension of the indoor living space – complete with a two-way fireplace for year-round use – outdoor spaces will

surely be utilized in the warmer months and viewed as additional square footage - and therefore added value - if properly finished/staged.
