

THE "SHOW" KITCHEN

The 3,500 to 5,000 square foot home now features the "back-of-house" spaces. Think of a service kitchen combined with a home planning desk, pantry, drop-off center or backpack cubbies.

The back-of house has now become the working kitchen with an "out-front" kitchen taking on a show kitchen appearance - no clutter, no dirty dishes, no countertop appliances, etc.

The hidden work space at the back of the house is desirable!
