

Master Down Plans

Can Look *Small*, Unless You Detail *Big!*

There is a slight increase in the demand for 1st floor master bedroom plans, but their street presence can be a challenge, especially when intermingled with traditional 2-story homes.

With proper detailing and location of any upper level spaces to the front of the home, you can avoid the “smallest-house-on-the-block look”. The key is to draw the eye up - even if there isn't much up.
